EXPERIENCE

Associate Research Fellow January 2026 – Present
BYU-Idaho Rexburg, ID

- Designed and ran randomized experiments to estimate causal effects on student performance
- Managed survey deployment and treatment assignment, producing clean datasets
- Built and integrated student–item datasets (Canvas, Qualtrics, admin); applied fixed effects models with clustered SEs
- Developed survey instruments and synthesized literature to support research design

Account Manager/Trainer June 2024 - December 2024
OptimalShip Rexburg, ID

- Supported client shipments and B2B sales, contributing $1,800+ in revenue while analyzing employee performance drivers
- Collaborated with internal teams to align operational goals with performance data and outcomes

PROJECTS

Retail Promotion Pricing & Demand Analysis Fall 2025
RStudio

- Analyzed 3 years of retail panel data to evaluate price sensitivity and promotion effects
- Modeled revenue impacts of promotional pricing and tested regional differences
- Delivered data-driven pricing recommendations based on statistical results

Market Analysis Project – Mutual Fund Selection Fall 2025
Power BI

- Cleaned and analyzed financial data to compare funds by risk and return
- Built dashboards and visualizations to communicate insights to non-technical users

VOLUNTEER/LEADERSHIP

Volunteer January 2023 - February 2025
Distinguished Young Women Madison County, ID, Idaho State

- Mentored participants through coaching and structured feedback following success in local and state-level presentations and interviews
